

## Bachelor in the English Language

### Specialty *English Language*

#### Brief Description:

This bachelor's training aims to equip students graduating in English in the LMD cycle with several linguistic, cultural, didactic, or critical skills. Not only will the student have the chance to develop these linguistic skills during the oral, written, grammar and language sciences sessions, but also to develop a critical mind during the sessions assigned to the course of works of literature and civilizations.

With the rise of new technologies, more and more language tools are available, adapting to each learning strategy. Each of these tools allows for working on a particular skill.
